**AXIUM3 Hand Bearing Compass - yellow or blue**
Superior damping of the compass-rose gives quick and highly accurate readings up to and within 1 degree.
Long life and accuracy is achieved with a sapphire-bearing in the balanced compass-rose.
Photo luminescent background lighting provides battery-free illumination.
Infinity prism delivers in-focus compass readings. Protective rubber collar with neck/wrist lanyard ensures safe use in challenging environments.
The red neopren rubber lanyard keeps the compass floating if dropped in the sea.
The unique optical system combined with our process of calibration practically eliminates parallax errors.

Axium3

Should the compass accidentally fall overboard, the red neoprene rubber loop ensures that the compass stays afloat.

**AXIUM3 compass**
Made in Denmark by Delite.
Accuracy ±1°.
2-coloured figures every 5° (see below).
Diameter ø80mm. Weight 155g.

Article no.
AX Y          Northern hemisphere
AX Y S       Southern hemisphere

A bearing is easily performed:
Read the position under the landmark - that's all.
This secures a correct bearing even in rough weather.
The need of a lubber-line is eliminated!

VION "Super plaisance" compass 1975

Just like the Axium 3 compass above, the Mini2000 compass now comes with a neck strap with a neoprene rubber loop that keeps the compass afloat in water. This is not shown in the Mini2000 image!

Mini2000

Founded in 1830, Vion has always manufactured navigation equipment in particular compasses, telescopes and marine instruments in the 19th and 20th centuries. In the beginning to the marine; on the great cargo ships and later to the aviation industry; on the modern long-distance flights such as Paris-Saigon and the 1930 Atlantic crossing. Vion has also supplied compasses to the French air force: Dassault Mystère and Dassault Mirage jet fighters were equipped by Vion. The French army has also been equipped with hand bearing compasses much like the Axium compass as it is Today!

**VION Paris hand bearing compass Mini2000**
Made in Denmark by Delite.
The same features as the AXIUM3.
Accuracy ±1°.
2-coloured figures every 5° (see below).
Diameter ø80mm. Weight 130g.

Art. no.: AX 2000
